* The 2008, 2010, 2012, 2014, and 2016 results published here may differ slightly from the 2008, 2010, 2012, 2014, and 2016 results published in site reports. This is because the site reports excluded data from schools that do not contain the grade in the question. Because grade information is not available in a consistent format for all years, data from these schools are included in the trend analysis.

    ${ }^{2}$ Based on t-test analysis, $\mathrm{p}<0.05$.
    § Analysis cannot be conducted when response rates are $100 \%$ for a census or prevalence estimates are all $0 \%$ or $100 \%$.
    【 Analysis cannot be conducted when response rates are $100 \%$ for a census or 2014 and 2016 prevalence estimates are both $0 \%$ or $100 \%$.

[^2]:    * The 2008, 2010, 2012, 2014, and 2016 results published here may differ slightly from the 2008, 2010, 2012, 2014, and 2016 results published in site reports. This is because the site reports excluded data from schools that do not contain the grade in the question. Because grade information is not available in a consistent format for all years, data from these schools are included in the trend analysis.
